

# Which axis tracks severity?

Size-axis (PC1) scores track severity most clearly for WFNS; shape-axis (PC2) scores do not (red = 95% CI excludes 1)

| Component | OR (95% CI) |
|-----------|-------------|
|-----------|-------------|

## modified Fisher

|                  |                  |
|------------------|------------------|
| PC1 (size axis)  | 1.25 (0.94–1.67) |
| PC2 (shape axis) | 1.03 (0.74–1.43) |

## Hunt & Hess

|                  |                  |
|------------------|------------------|
| PC1 (size axis)  | 1.24 (0.98–1.57) |
| PC2 (shape axis) | 1.12 (0.81–1.55) |

## WFNS

|                        |                         |
|------------------------|-------------------------|
| <b>PC1 (size axis)</b> | <b>1.35 (1.06–1.73)</b> |
| PC2 (shape axis)       | 1.20 (0.87–1.66)        |
